Adesto to Demonstrate its Embedded Systems, ASIC & IP, and Memory Solutions Together for the First Time at Electronica

November 8, 2018

SAN JOSE, Calif., Nov. 08, 2018 (GLOBE NEWSWIRE) -- Adesto Technologies (NASDAQ: IOTS) will share its latest technology developments at Electronica – the world's largest trade fair and conference for electronics.

Who: Adesto, a leading provider of innovative application-specific semiconductors and embedded systems for the IoT era

Following its recent acquisitions of S3 Semiconductors and Echelon Corporation, Adesto will showcase for the first time a multitude of solutions from the combined company – all targeting IoT edge and communication gateway systems. In Hall C3, Booth 121, attendees can see these demonstrations, including:

What:

- The SmartEdge™ platformwhich provides a uniquely optimized way to integrate sensing, calibration, control, security and communication functions into a single ASIC for industrial edge computing, resulting in up to 75% less PCB area and power, with 80% lower BOM cost.
- Memory products that bring performance enhancing features to any design, including the Octal EcoXiP™ which removes barriers for mass-market execute-in-place applications; Adesto's newest Non-Volatile Memory (NVM) devices that bring a host of power saving and CPU offload features for low-power and data logging applications; and the lowest-power, fastest EEPROM device available in the market today.
- The new SmartServer IoT edge server which helps OEMs and integrators dramatically reduce industrial IoT solution development and deployment time with built-in network management for edge protocols, a proven data management solution, and secure cloud connectivity all in a single programmable system with flexible, open and easy-to-use APIs.
- The latest PowerLine Communications solutions with programmability and proven superior performance in providing robust communication in rough channel conditions, making them ideal for a wide range of applications including smart grid/metering, smart lighting, solar, and industrial automation.

When: Electronica will be held November 13 – 16, 2018.

Where: Hall C3, Booth 121, Messe München, Messegelände, 81823 Munich, Germany

About Adesto
Adesto Technologies (NASDAQ:IOTS) is a leading provider of innovative application-specific semiconductors and embedded systems for the IoT era. The company's technology is used by more than 2,000 customers worldwide who are creating differentiated solutions across industrial, consumer, medical and communications markets. With its growing portfolio of high-value technologies, Adesto is helping its customers usher in the era of the Internet of Things. See: www.adestotech.com.
